New MOBILedit ULTRA: From the Latest Smartwatch Forensics to Powerful Phone Unlocking

Learn how to investigate smartwatches—a fast-growing and often overlooked source

of crucial digital evidence. From health and location data to activity logs, smartwatches can reveal key insights that other devices simply don't provide.

Discover how MOBILedit, the only forensic tool focused on smartwatch data extraction, is helping investigators uncover vital information in real cases.

See how this capability is now part of the all-new MOBILedit Forensic ULTRA—an all-in-one solution for forensic labs, combining smartwatch, phone, and cloud data analysis, now empowered with powerful unlocking and security bypassing features.
